Replacement
Window*

Heavy .062 aluminum extrusion with structural thermal barrier for maximum strength and insulation.

Double Fin Seal weatherstripping for minimum air infiltration even during extreme cold when most weatherstripping fail.

Standard double strength glass with 1/2 inch spacer bar for twice the dead air space of most insulating windows.

Polyurethane thermal break in all frame and sash components to minimize heat and cold transfer.

Large bulb seal for sure sealing under all weather conditions.

Dual spring latches autocratically lock when sash is closed for safety and convenience.

ADDITIONAL FEATURES

- Bottom sash tilts for easy cleaning
- Half screen removes to the inside
- Maintenance free powder coated finish
- Maintenance free constant force balance system
- Available Low-E and tinted glass for improved thermal performance
